

Ausa D1001AHG

£POA

The DR1001AHG reversible dumper has a 10,000 kg (22,000 lb) payload and comfortable hydrostatic transmission. Thanks to the innovative reversible design, the seat can rotate 180 degrees and all components are instantly adjusted to suit the driver's new position: steering wheel, joystick, pedals, safety cameras, etc. The driver can also comfortably and safely get on and off both sides of the dumper, so speed and flexibility are significantly increased.

In terms of technology, various systems have been included to make it a more efficient dumper: it has the ECO Mode function, where the engine speed is automatically controlled to ensure lower
